

## Expand Lightbox

A portable light box to make your message shine

With the portable Expand LightBox, your message and brand stand out a bit extra at any exhibition or event – both large and small. It is easy to set up, take down, pack in the nylon bag and transport in your car.

This light box can be used as a free-standing backlit wall, or integrated with the popular Expand GrandFabric system. If it is used as part of a stand, you create a configuration to fit your needs and the entire stand can be varied in both shape and size depending on the floor space.

### Communicate with light - both front and back

If you choose print on both back and front, your message shines in two directions – perfect in environments where viewers come from different directions. If you only want print on one side, the back comes with a light reflecting fabric.

### Available in two different types of fabric

Choose between a stretch fabric that you pull over the frame (like a pillow case) or a two-piece fabric - where you insert the silicone edge (called SEG - Silicone Edge Graphic) into the gap in the frame.

### Great light distribution with LED

This light box is illuminated with LED light, placed in the top and bottom, to provide an even glow over the graphics. It has a low electric consumption - which is good for the environment. It is also made for different types of electrical standard - EU and US.

### Sizes and weight

The light box is available in different sizes and can be ordered both single and double-sided.

#### Light boxes 80cm high

80x80 cm = 0,5 kg  
80x160 cm = 13 kg  
80x240 cm = 17 kg

#### Light boxes 160cm high

160x80 cm = 14 kg  
160x160 cm = 17,5 kg  
160x240 cm = 20,5 kg

#### Light boxes 240cm high

240x80 cm = 18 kg  
240x160 cm = 21 kg  
240x240 cm = 24,5 kg

### Easy to transport and to set up!
